

Edanur YURTTAŞ

Mechanical Engineer | Mechanical Design | Product Development

Bursa, Türkiye (Open to Relocation) | eda.yurttas00@gmail.com | (+90) 535 783 62 70 | LinkedIn | Portfolio

Professional Summary

Recent Mechanical Engineering graduate with internship experience in the automotive industry, specializing in mechanical design, product development, and engineering documentation. Hands-on experience in CAD modeling, product data management (PDM), and product validation processes. Eager to contribute to an engineering team while further developing technical expertise in mechanical design and product development.

Professional Experience

Mechanical Engineering Intern, AKWEL – Bursa, Türkiye 02/2024 – 06/2024

- Developed a 3D CAD model of the KO Door Bench in CATIA V5 based on dimensional measurements for moment of inertia calculations.
- Verified product codes by comparing SC Lists with technical drawings, supporting engineering documentation activities.
- Contributed to an Excel VBA-based engineering tool by preparing Workspace codes, CAD images, and BOM data extracted from the ENOVIA PDM system.
- Conducted benchmarking studies on competitor automotive component manufacturers by analyzing product portfolios, manufacturing methods, and business activities, and prepared comparative reports.
- Performed product validation by measuring hinge drop forces after the 0th, 10th, and 30th test cycles using a dynamometer.
- Created 3D CAD models of striker, hinge, and pedal components in CATIA V5 based on existing engineering reference data.

Mechanical Engineering Intern, Can Kalibro – Bursa, Türkiye 09/2023 – 09/2023

- Analyzed fixture manufacturing processes by observing production planning, CAM preparation, CNC machining, assembly, and quality control stages.
- Observed measurement and calibration activities in the CMM laboratory to gain practical knowledge of coordinate measuring systems and inspection procedures.

Mechanical Engineering Intern, Turkas Gas Springs – Bursa, Türkiye 07/2022 – 08/2022

- Observed gas spring manufacturing processes, including machining, assembly, and functional testing operations.
- Gained practical exposure to quality control procedures by observing the use of digital calipers, Zwick Roell testing equipment, and other precision measuring instruments.

Technical Skills

CAD Software: CATIA V5, SolidWorks ve AutoCAD (Solid Modeling, Assembly, Technical Drawing)

PLM / PDM: ENOVIA PDM, Technical Drawing Review, Bill of Materials (BOM), SC List

Microsoft Office: Excel (Formulas, Data Management), Word, PowerPoint

Languages

Turkish: Native

English: Technical Documentation Reading, Basic Professional Communication

Education

Bilecik Şeyh Edebali University, BS in Mechanical Engineering – Bilecik, Türkiye 09/2019 – 06/2024

- GPA: 3.16/4.0

Bachelor's Graduation Project

Bilecik Şeyh Edebali University – Bilecik, Türkiye 09/2023 – 01/2024

- Conducted a literature review for an undergraduate research project focused on improving the surface properties of Inconel 718 alloy.
- Performed hardness measurements on heat-treated specimens and contributed to experimental data analysis.
